CSCU-Certified Secure Computer User (112-12)

This course has been designed by the EC-Council Federation to make the user understand the importance of protecting its information assets. The Certified Secure Computer User (CSCU) course delivers fundamental knowledge of the various nasty cybercrime activities such as identity theft, credit card scams phishing scams, backdoors and viruses, e-mail hoaxes, loss of classified data, hackers, online sex offenders and social engineering that can destroy the organization's security infrastructure.

Mercury Solutions provides CSCU Exam Prep Training by providing valuable hands-on lab environment that builds a solid foundation of networking and security skills. This course increases the credibility of the candidates to build recognition of their expertise across the domain of networking and security.
