CCNA R&S & CCNP

This is one of the most popular combination training among networking professionals. The new revamped curriculum incorporated by Cisco for CCNA R&S is enhanced to ensure delivery of updated knowledge to professionals in this domain. This combo course consists of the trainings of both CCNA and CCNP latest version modules developed by Cisco. Considering that these certifications are supporting the new generation of the Cisco Networking job roles and meeting industry requirement. CCNA equips the professional to configure, install, operate and troubleshoot medium-sized routers and switches. While CCNA is the beginners level and CCNP is the intermediate levels of Cisco certification career path.
